SUMMARY

I'm a Full-Stack Web Developer who was attending to General Assembly Web Development Immersive course which is 3 month bootcamp, learning about Javascript, Ruby, Ruby on Rails and so on.

Previously was working at business field but working on building own website made me got into web development.

EXPERIENCE

GENERAL ASSEMBLY(full-time Web Development Intensive)

New York, NY — Aug.2014- Oct.2014

- Over the course of 12 weeks, built and deployed 4 single-page apps.
- So far worked on two projects, one is mini-blog website which was coded by Ruby and used Instagram API. The other one is ToDo list which is a single-page app and making Ajax Call and constructed by Backbone.js
- During a group project we utilized Github to organize our codes and deploy it with heroku. The project included Google Map API and some technic of Bootstrap and some Underscore.js.
